

Make working together less work.

When you connect the people that drive the process, you keep business moving.

Nintex is easy, point-and-click workflow automation that makes collaboration easier. With Nintex, you can turn time-consuming tasks into a few simple clicks. You can turn inefficient, company-wide processes into well-run engines. You can connect every person, department and system inside or outside of your business, so nothing gets in the way of getting work done.

Nintex Workflow

Use clicks, not code, to drag and drop processes into place and automate both simple and sophisticated workflows.

Nintex Forms

Quickly build user-friendly forms that capture the data you need and eliminate cumbersome, costly paper.

Nintex Hawkeye™

Easily track how work is flowing, identifying which processes yield the best results and which are ripe for improvement.

Nintex App Studio

Quickly create custom, targeted and powerful mobile workflow applications without writing a single line of code.

Nintex Connectors

Integrate your workflows with content collaboration systems, line of business applications and more, connecting your work to the rest of your world.

Document Generation

Automate the process of creating documents, automatically building Word, PowerPoint, Excel or PDF files directly from your data.

NINTEX

Automate your processes, whatever your platform.

No matter where you keep your content, Nintex workflow automates your processes, so that everyone along the process can connect, collaborate and keep on working.

Everywhere

Connect to all your content—wherever it is—through the cloud, and keep work flowing.

Plus SharePoint.

Automate workflows using SharePoint, so you can keep projects and processes moving without all the manual work.

And Office 365.

Build workflows using Office 365 and use your Office apps, documents and data to get more done.

Let's keep the conversation going.

Access information, find help or how-to's and connect with Nintex workflow pros.
