

4 Key T&E Priorities for Financial Services.

1
Cost

You know plenty about cost pressures, but do you know how to control them?

- Get a complete picture of T&E spending.
- Negotiate better rates and effectively manage budgets.
- Trim time and manual steps from the process.

2
Security

You handle people's most private financial information. Why should your T&E data be any less secure?

- Protect T&E data with the industry's highest security standards.
- Meet GDPR standards with a multi-layered approach.

3
Digitalization

The Digital Revolution is on. Are you winning or losing?

- Give your employees the best mobile experience and popular travel apps.
- Digitize T&E details with electronic receipts and expense reports that write themselves.

4
Risk

How much risk is worth the risk?

- Increase regulatory compliance by automating approval processes, spending thresholds and policy protocols.
- Meet your duty of care by connecting to and supporting travelers all over the world.
- Reduce the chances of fraud with smart controls and greater visibility into your T&E spend.

**T&E is likely your second-largest line item.
The more you know about it, the easier it is to control.**
